JOB VACANCY:

PROJECT AND INFRASTRUCTURE SPECIALIST

ABOUT US

FG Gold Limited has been awarded the Baomahun Gold concession project located in Valunia Chiefdom, Bo District, and is currently in the development phase. To support this project development, FG Gold Limited is seeking a qualified individual to fill the 2 vacant positions of Project and Infrastructure Specialist.

RESPONSIBILITIES

The Project and Infrastructure Specialist is responsible for providing advanced technical expertise and hands-on leadership in infrastructure and projects for the processing plant during the construction, commissioning, start-up and operational phases of the Greenfield gold mining project.

The role ensures that work on site infrastructure is carried out to high technical standards, and that national employees are trained and assessed to take over the work with confidence.

The Project and Infrastructure Specialist will troubleshoot and lead complex work, develop procedures, train and certify local tradespeople, and drive continuous improvement using industry best practice. The position plays a critical role in ensuring operational readiness before plant commissioning while building a skilled, locally sustained maintenance team.

- Provide technical support on the maintenance and upgrade of roads, buildings, camp facilities, water and sewage treatment and power reticulation. Support delivery of minor capital and infrastructure projects, including scope, estimates, contractor coordination, inspections and handover documentation.
- Train, coach and mentor national tradespeople, leading hands and trainees on the job and in the workshop. Develop training material, competency standards and assessment checklists.
- Develop, review and enforce Standard Operating Procedures, work instructions and safe-work procedures. Ensure work meets OEM, statutory and company standards.
- Investigate failures, support Root Cause Failure Analysis and record findings. Recommend improvements to maintenance routines, spares and tooling.
- Support planned shutdowns with scope, job plans, resource estimates and spares lists. Specify critical spares, special tools and consumables with Supply Chain and Warehouse.
- Promote Zero Harm principles and lead by example in safe work practices, Permit to Work and isolation. Lead Job Safety Analyses, risk assessments and toolbox talks.

QUALIFICATION, SKILLS & EXPERIENCE

Educational Background:
Civil, Building or Mechanical Trade Certificate. Advanced trade qualification or technical diploma in Civil, Structural or Mechanical Engineering or a related discipline (desirable).

Experience:

- Minimum of 7 years' advanced troubleshooting and field experience in infrastructure and projects, with coaching, competency development and safe-work procedure capability.
- Previous experience in a Greenfield mining project, commissioning or operational readiness environment.
- Experience with roads, buildings, camp facilities, water and sewage systems, power reticulation and civil structures.
- Desirable: experience in large-scale gold mining operations and contractor management.

Technical Skills:

- Infrastructure and civil maintenance
- Project and contractor management
- Water and power utilities
- Building and camp facility maintenance
- Cost estimating and budgeting
- Mining safety legislation and risk management
- CMMS systems and Pronto ERP
- Mining safety legislation and risk management
- Coaching, mentoring and training skills
- Excellent communication and interpersonal skills

Languages:

Fluency in English.

Physical Requirements:

- Site-based Greenfield mining project; remote mine location.
- Roster-based employment.
- Site-based infrastructure, construction and camp environments with exposure to heat, dust and working outdoors.
- Occasional work outside normal business hours during shutdowns, breakdowns and commissioning activities.
- Frequent interaction with operational, maintenance and project teams.
